REPORT OF THE SENSITISATION PROGRAMME

ON

"CYBER SAFETY: THE DAILY NEED" CYBER CRIMES, CYBER LAWS & SECURITY MEASURES

Organized by
DISCUSSION & DEBATE CLUB
LALBABA COLLEGE

01-04-2023

Aim of the Club: Discussion and Debate (D&D) Club of Lalbaba College puts stress on holding seminars/Discussion and Debate in order to educate the students on diversified ranges through extra-curricular involvement in the college and encourages them in free participation. It keeps an aim to equip the students in the coming days by exploring the hidden talents of the students.

Objectives of the Programme

1. Addressing security challenges related to smartphones, tablets and other mobile devices as well as providing guidelines for securing remote work environments.
2. Encouraging students and employees to promptly report any suspicious activities or security incidents to the appropriate authorities.
3. Raising awareness about distinct types of malwares (e.g., viruses, ransomware), what they look like and how to avoid infection.
4. Educating students and employees about the risks associated with social media usage, such as oversharing, social engineering attempts and managing their digital footprint.
5. Teaching students and employees to prevent unauthorised physical access to facilities by unauthorised individuals thus keeping the physical realm safe. And promoting the importance of clearing desks of sensitive information to prevent data breaches.
6. Explaining how to categorise data based on its sensitivity, and the appropriate handling and storage procedures for each classification to ensure confidential information is where it needs to be.
7. Understanding the potential cyber security risks associated with third-party vendors and suppliers and supplying targeted training to external partners to maintain a security standard.
8. Educating students and employees on best practices for securely using cloud services and platforms.
9. IoT security: Addressing the unique security challenges posed by Internet of Things (IoT) devices in the workplace.
10. Identifying and mitigating cyber threats that may increase during holiday seasons or special events with timely training and awareness materials.

ACTIVITY REPORT, D&D CLUB, LALBABA COLLEGE

Cyber Safety – The Daily Need

The Discussion and Debate Club (D&D Club) of Lalbaba College organized a sensitisation programme regarding Cyber Crimes, cyber laws & security measures on 1st April, 2023 at Saratchndra Sabhagriha (College

Auditorium). The programme began with felicitating Principal, the Chairperson, and Mr. Rajarshi Rai Choudhury, the chief guest and speaker of the day's programme by Prof. Sanhita Ghosh. Dr. Chhatradhar Das, coordinator of the Discussion and Debate Club, introduces the chief guest before the audience. Principal greets the chief guest and the audience assembles in the auditorium. After completion of the introductory programme, Mr. Rai Choudhury began the technical session with discussing cyber security.

Our students are spending more time online than ever before in this digitally linked society. Cyber security is the state or process of defending against and recovering from cyber-attacks on computer systems, mobile devices, electronic systems, networks, and software. It is crucial since it guards against data theft and hacking-related damage for all types of data. Sensitive information, personally identifiable information (PII), protected health information (PHI), personal data, intellectual property information, and information systems used by the government and business are all included here.

Our sensitive data is at risk from increasingly sophisticated cyber-attacks that are

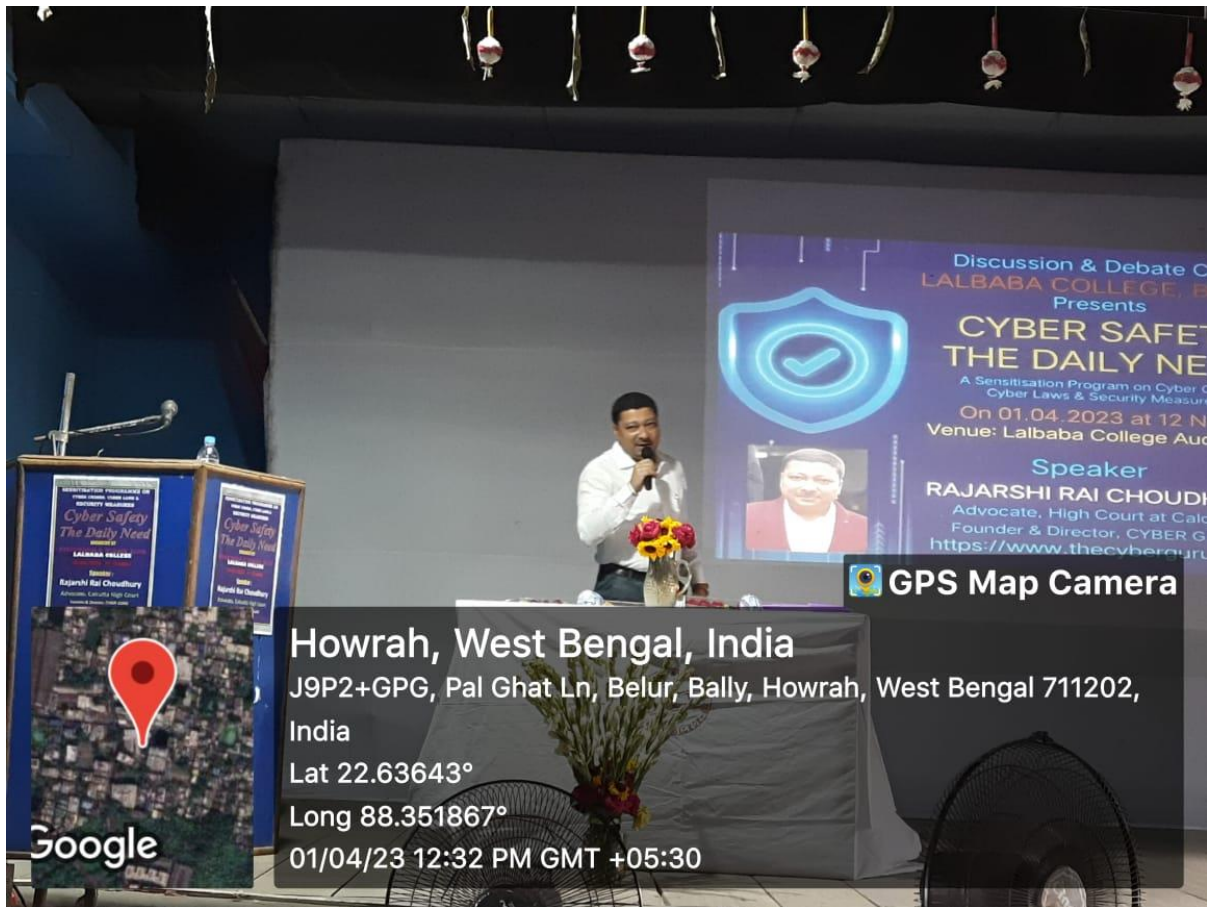

always evolving. To get over standard data security measures, attackers frequently use new techniques fuelled by social engineering and artificial intelligence (AI).

ACTIVITY REPORT, D&D CLUB, LALBABA COLLEGE

The world is becoming more and more dependent on technology, and this dependence will only increase as we develop the new technologies that will link to our connected devices via Bluetooth and Wi-Fi in the future.

Intelligent cloud security solutions should be used in conjunction with strict password regulations like multi-factor authentication to reduce illegal access in order to safeguard client data while embracing new technologies. An overview of cyber safety measures will be provided in this workshop.

Outcome of the programme:

After successful completion of the sensitization programme a questionnaire session was conducted for doubt clearing. Many from the audience shared their experience of being cheated, duped and compromised. Some of the experience involved monetary loss, SIM-swap-fraud etc. However, it is expected that the programme easily clarified the following:

- (a) Security can be breached with a blink of an eye. One's personal information is just a click away. Therefore, any suspicious link and App must altogether be avoided.

ACTIVITY REPORT, D&D CLUB, LALBABA COLLEGE

- (b) The programme ensures that all students and employees received consistent information and instruction on how to handle and protect sensitive information and assets.
- (c) It helps to create a culture of security where every student and employee understands the importance of their role in maintaining security.
- (d) This programme enrich the students and employees about the risk of data breaches and other security incidents and also aware them about the potential threats and how to avoid those.

The programme ended with vote of thanks by Dr. Ajit Kumar Singh.

Participation Status

Participation	Department	No. of Student
Student Participation	Political Science	15
	Philosophy	18
